NEW METRIC THREAD SPOKES AND NIPPLES

Metric thread spokes and nipples are now being used on all V-Twin motorcycles.

When our present stock of NS Thread Spokes and Nipples are used up, we will supply only the metric thread spoke and nipple as a set, and in quantities of ten sets per package.

This applies only to the following part numbers:

43024-73 Spoke replaced by 43024-73A metric spoke and nipple
43025-73 Spoke replaced by 43025-73A metric spoke and nipple
43031-70 Spoke replaced by 43031-70A metric spoke and nipple
43032-40 Spoke replaced by 43033-40A metric spoke and nipple
43033-40 Set of 40 spokes and nipples is obsolete (Order 43032-40A)

Presently, the only metric spoke and nipple that we have available is 43031-70A and NS Thread Spoke 43031-70 is already obsolete.

We will continue to ship NS Thread Spokes Part Numbers 43024-73, 43025-73 and 43032-40 until all are used up. At such time we will automatically substitute the metric thread spoke and nipple sets.

Please note that metric thread spokes and nipples will not be sold separately since they are only interchangeable with NS Thread Spokes when replaced as a set.
