IMPORTANT PAINT NOTICE

1976 VIVID COLORS - QUARTS & SPRAY PAINT

The 1976 vivid colors except for black are air dry enamel! Not lacquer, which is incorrectly printed on the can labels.

If you have any quart or spray cans of VIVID ORANGE, VIVID BLUE, VIVID RED or VIVID BROWN, please change the label to "ENAMEL". It is most important that you do not apply lacquer clear coat part #98603 DN (Quart) or 98607 DN (spray) over any of the above colors. (Lacquer clear coat can only be sprayed over lacquer).

We are rushing to have a new Acrylic Clear Coat available shortly, which can be sprayed over either Acrylic Lacquer or Enamel. The part numbers are 98603 EA for quarts and 98607 EA for spray.

All paint shipped in the future will be labeled correctly. Please follow instructions on the can label.

NEW PAINT COLOR

Champagne Silver Acrylic Lacquer will soon be available in both quart and spray cans. The part numbers are as follows:

98603 DX	Quart Can
98607 DX	Spray Paint (6 per case)

NEW WHITE PRIMER

In order to achieve a proper color match, VIVID ORANGE must be sprayed over white primer. All other colors will continue to be sprayed over Gray Primer. The part numbers for the new White Primer are as follows:

98603 DW	Quart Can
98607 DW	Spray Paint (6 per case)
