BRAIDED CABLES

Model Application & Improperly Manufactured Cable No. 56454-81

The following Braided Throttle Cables will fit only the throttle side of 1981 & later vehicle controls. These cables will not fit the single throttle cable application of 1980 and earlier models:

56458-81	Stainless Braid Standard Length	(40")
56459-81	Stainless Braid Long Length	(48")
56460-81	Brass Braid Standard Length	(40")
56461-81	Brass Braid Long Length	(48")

Cables with fittings for single throttle applications will be available in March. The numbers are:

91715-82	Stainless - Throttle Standard Length	(40")
91716-82	Stainless - Throttle Long Length	(48")
91717-82	Brass - Throttle Standard Length	(40")
91718-82	Brass - Throttle Long Length	(48")

Inspection has found some cables, P/N 56454-81 with 5/16-18 threads instead of 1/4-20 on the throttle grip end. Please check your inventory on this number and return any having the 5/16-18 threads per attached "E-Form" sample. A new order should be placed to obtain correct cables.
