V² EVOLUTION™ TAPPET CHANGE AFFECTS

SCREAMIN'EAGLE SOLID LIFTER KIT

The V² Evolution™ engine has a new style valve tappet. The tappet (P/N 18522-85) started into engine production in April beginning with crankcase set #1585 093 013. While it interchanges with the earlier unit (P/N 18522-83), the new tappet will not accept the Screamin'Eagle Solid Lifter Kit (P/N 18500-84) due to differences in internal design. DO NOT attempt to use the Solid Lifter Kit with these new tappet assemblies.

A new Solid Lifter Kit is now on test and will be available soon. In the interim, keep in mind that the Cam and Spring Kit (P/N 25490-84) was designed for use with hydraulic or solid lifters and may be run successfully either way.
