PERFORMANCE PARTS

CARB & AIR CLEANER KIT, P/N 91731-85

AIR CLEANER ELEMENTS

We have been advised by our air cleaner element supplier that some of the elements used in the Carb & Air Cleaner Kit may be defective. The rubber compound which forms the back plate and mounting spigot was not properly cured. This may result in the mounting spigot tearing away from the back of the element. The problem is confined to those air cleaner elements having black finished front covers, though not all such elements are suspect. All elements with silver finished front covers are properly cured. Failed elements will be replaced under warranty.

SERVICE PARTS

A list of common service parts is attached for the Screamin'Eagle Carb & Air Cleaner Kit. File it along with the Specification Sheet in your Dealer Accessory Guide for convenient reference. While not an exhaustive listing, it contains the parts which are most likely to be required due to normal wear and tear. Should the need arise for parts not on the list, contact your P&A Account Representative regarding availability. Parts for the carburetor proper are expected to be available approximately 10/1/85. All other parts are in stock.
