INSTALLING PREMIUM INTERCOM/CB SYSTEM 77075-87 ON 1988 MODELS

Harley-Davidson's new 1988 Premium Radios include an improved amplifier which is less sensitive to voltage changes. Because of this sensitivity change, we have experienced delays interfacing Premium Intercom/CB Systems to our 1988 radios.

Do Not Attempt To Install Intercom/CB System 77075-87 on 1988 Models. Parts and Accessories is currently designing and testing an 'adapter' which will enable you to install our Intercom/CB System on 1988 models. As soon as we have an approved and tested adapter design available, we will notify you through a product specification sheet.

In summary, and until our 1988 radio 'adapter' is available, our Premium Intercom/CB System can only be installed on models equipped with 1986-1987 style premium radios.

Thank you.
