WRAP AROUND KING TOUR-PAK LAMP KIT

PART NO. 68012-88

Tests conducted by our air dry acrylic lacquer supplier indicate that the lamp housing in this kit can be color matched to your customers tour-pak, if so desired.

If you are going to color match a customers lamp housing to the tour-pak, a coat of Harley-Davidson Gray Primer (98603A Quart/98606A Aerosol) should be applied prior to the base and/or topcoat color. This is important because most top coat paints we offer are semi-transparent and rely on gray primer for an accurate color match.

When ordering Harley-Davidson acrylic lacquers, please refer to your Air Dry Paint List or Color Charts for colors and part numbers.

NOTE:

The information contained in this bulletin is also a "Sales Aid". It gives you the opportunity to make additional profits on parts and labor. Use it to your advantage.
