FLT Model Antenna Set Screw **Part Number 3266**

As a result of your requests, Harley-Davidson will now be selling the SET SCREW (Part Number 3266) which is used in two positions on the spring-loaded base of the 1993-1994 FLT model AM/FM/CB radio antenna. This set screw may be used on antenna P/N 76250-86B (1993 - early 1994 FLT) and antenna P/N 76250-86C (late 1994 FLT).

Please note that if either antenna 76250-86B or antenna 76250-86C is retrofitted on a 1986-1992 FLTC/FLHTC (non-Ultra) model, this set screw will work in that earlier application also.

This new set screw should be available in early March 1994. Please make a note of this information in the appropriate parts catalogs.
