## DEUTSCH ELECTRICAL CONNECTORS

DEUTSCH electrical connectors are used on all 1994 XLH and FLT models. The following is a list of all current DEUTSCH electrical connector components which are available from Harley-Davidson, Inc. 2-, 3-, 4-, and 6-way connector housings are available in black plastic only; these black housings are suitable replacement parts for both the black and gray original equipment housings. 8- and 12-way connector housings are available in both black and gray plastic. Because they have different engagement indexing, the 8- and 12-way black housings are not interchangeable with the respective gray housings. An internal seal is included with each socket housing part number listed below.
